

## People with or exposed to COVID-19 should not attend in-person celebrations

Do not host or participate in any in-person festivities if you or anyone in your household

- ◆ Has been diagnosed with COVID-19 and has not met the criteria for when it is safe to be around others
- ◆ Has symptoms of COVID-19
- ◆ Is waiting for COVID-19 test results
- ◆ May have been exposed to someone with COVID-19 in the last 14 days
- ◆ Is at increased risk of severe illness from COVID-19

## BRC Guidelines for Visitors

### Independent Living:

- ◆ Visitation is permitted outdoors and in personal residences
- ◆ Visitors should avoid indoor common spaces and gathering areas
- ◆ Visitors are not permitted in the Custer Room, fitness center, or Maple Grove Salon
- ◆ Visitors may get take-out food from the Junction but may not dine in
- ◆ When visiting apartment buildings, proceed directly to individual residence and do not linger in hallways
- ◆ Wear a mask at all times and maintain distance of 6 feet

### Nursing Households, Assisted Living, and Gardner House:

- ◆ Visitation by appointment only
- ◆ Make appointments directly with the household
- ◆ Follow all guidelines as directed

## Considerations for Family Gatherings on Campus

## Community Levels of COVID-19

Family and friends should consider the number and rate of COVID-19 cases when considering whether to host or attend a celebration. A local positivity rate of more than 5% poses moderate to high risk for gatherings.

Higher levels of COVID-19 cases and community spread in the gathering location, as well as where attendees are coming from, increase the risk of infection and spread among attendees.

## Location of the Gathering

Indoor gatherings generally pose more risk than outdoor gatherings.

Indoor gatherings with poor ventilation pose more risk than those with good ventilation, such as those with open windows or doors.

## Duration of the Gathering

Gatherings that last longer pose more risk than shorter gatherings.

## Number of People at the Gathering

Gatherings with more people pose more risk than gatherings with fewer people.

The size of a gathering should be determined based on the ability to reduce or limit contact between attendees.

## Where Attendees are Traveling From

Gatherings with attendees who are traveling from different places pose a higher risk than gatherings with attendees who live in the same area.

High levels of COVID-19 cases and community spread in the local area, and where attendees are coming from, increase the risk of infection and spread among attendees.

## Behaviors of Attendees Prior to Gathering

Gatherings with attendees who are not adhering to social distancing (staying at least 6 feet apart), mask wearing, hand washing, and other prevention behaviors pose more risk than gatherings with attendees who are engaging in these preventative behaviors.

## Behaviors of Attendees During the Gathering

Gatherings with more preventive measures in place, such as mask wearing, social distancing, and hand washing, pose less risk than gatherings where fewer or no preventive measures are being implemented.

**Enjoy your time with  
your loved one(s)**

**Mask/Hand-Washing/  
Social Distance**
